

Quiz Review Questions

Be prepared to answer 3 of the following questions:

1. What are (and what evidence supports) the Trichromatic and Opponent Process theories of color vision, and how does the anatomy of the visual receptors reconcile these two theories?
2. What is auditory masking, and how does the anatomy of the ear explain the phenomenon?
3. What are Bishop Berkeley's two arguments for psychological atomism, and what facts about the visual system and visual stimuli argue against Bishop Berkeley's position?
4. How does the cognitive view of classical conditioning differ from the behavioral view, and what evidence supports the cognitive perspective on learning?
